

Strategies and Case Studies in Campus Sustainability

As part of the IARU goal to provide the University sector with information that can assist others beginning the journey towards campus sustainability, this page provides links to various projects being undertaken by member institutions. These links will take you to case studies (including building and equipment design and organisational change arrangements) and collaborative and student base initiatives. The page is updated regularly and the links are arranged under the respective Universities. The page should be read in conjunction with the Campus Sustainability Toolkit.
